

Homework for Seminar 4

Read: *Walliman, Ch 3: Structuring the Research Project*

This week you will practice defining a research problem (not necessarily the problem you will write your essay on).

- (1) Choose a research problem to practice on, for example one of the projects your group presented in last week's seminar. Write it down.
- (2) Use the approach described on p 33 to break the problem down into at least four sub-questions.
- (3) Formulate a hypothesis, and operationalize if necessary.
