

## HOMework FOR SEMINAR 6

Read the paper *Is Computer Science Science?* (Peter J. Denning, 2005) and provide written answers to the questions below.

1. What is the first objection to Computer Science being a Science?
2. Which are the three activities in Computer Science?
3. What do you think of the statement that Computer Science is not about data but about information?
4. Are there examples of the scientific process in Computer Science?
5. “Computer Science only deals with man-made objects.” Object to this!
6. What is Latour’s view and how does it apply to Computer Science?
7. Do all Computer Scientists consider Computer Science to be a Science?
8. In what way is Computer Science similar to Yugoslavia?
9. What is the similarity between Computer Scientists and Renaissance artists?
10. Does Computer Science have any deep results?
11. What is claimed in *The End of Science* and how does it apply to Computer Science?
12. What is the fundamental objection?
