Check points

Check I

Task I - Integral image and feature computation

Explain/Show to TA	Completed
your written code produces output agreeing with those at the debug points	<input type="checkbox"/>
the code you wrote for this task	<input type="checkbox"/>
display a computed integral image	<input type="checkbox"/>

Task I completed:

TA's signature _____

Date _____

Check II

Task II - Boosting to learn a strong classifier

Explain/Show to TA	Completed
your written code produces output agreeing with those at the debug points	<input type="checkbox"/>
the code you wrote for this task	<input type="checkbox"/>
display the learned classifier	<input type="checkbox"/>

Task II completed:

TA's signature _____

Date _____

Check III

Task III - Classifier evaluation

Explain/Show to TA	Completed
your written code produces output agreeing with those at the debug points	<input type="checkbox"/>
the code you wrote for this task	<input type="checkbox"/>
display the final ROC-curve computed	<input type="checkbox"/>

Task III completed:

TA's signature _____

Date _____

Check IV

Task IV - Face detection in an image

Explain/Show to TA	Completed
your written code produces output agreeing with those at the debug points	<input type="checkbox"/>
the code you wrote for this task	<input type="checkbox"/>
show detection results for the image ..	<input type="checkbox"/>

Task IV completed:

TA's signature _____

Date _____

Check V

Task V - Build a cascaded classifier

Explain/Show to TA

Completed

your written code produces output agreeing with those at the
debug points

the code you wrote for this task

Task V completed:

TA's signature _____

Date _____
